SUMMARY

AI/ML Engineer with hands-on experience building real-world AI solutions across Machine Learning, Deep Learning, Computer Vision, and Generative AI. Currently working on voice AI agents, computer-vision-based interior styling systems, and practical AI automation to solve real business and consumer problems. Experienced integrating AI models into production-ready applications using Python, TensorFlow, PyTorch, Scikit-learn, OpenCV, and FastAPI. Runner-Up at ByteSprint 2025 and an active participant in several national and international hackathons, with additional entrepreneurial experience running an e-commerce business.

EDUCATION

Bachelor of Computer Science (Artificial Intelligence)

September 2022 – 2026 (Expected)

Abdul Wali Khan University Mardan, Pakistan

Courses: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Data Structures & Algorithms, Data Engineering, Web Development, Database Systems, Software Engineering.

EXPERIENCE

AI Engineer Intern

Codecilex — Onsite

- Developed a Text-to-Speech (TTS) voice agent for automated speech applications.
- Built an AI Room Scan & Interior Styling System combining computer vision with generative styling recommendations.
- Worked on computer vision and AI automation initiatives, integrating AI models into practical, production-ready applications.
- Collaborated with cross-functional teams to deliver production-ready AI solutions.

PROJECTS

AI Room Scan & Interior Styling System

Computer-vision-based system that scans a room and generates AI-driven interior styling recommendations.

Tools And Technologies: Python, OpenCV, Generative AI, FastAPI

Text-to-Speech Voice Agent

Automated conversational voice application built for natural, real-time speech interaction.

Tools And Technologies: Python, TTS Frameworks, FastAPI

Flood AI Chatbot

Conversational assistant built during the Flood.pk Hackathon (NIC Peshawar) to help users get flood-related information.

Tools And Technologies: Python, NLP, Prompt Engineering

Fake News Detection

NLP-based classifier trained to flag unreliable and misleading news content.

Tools And Technologies: Python, Scikit-learn, NLP

Heart Disease Predictor & Cancer Stage Prediction

Machine learning models built to predict healthcare risk and disease stage from patient data.

Tools And Technologies: Python, Scikit-learn, Pandas, NumPy

Credit Risk Analysis & Email Spam Detection

Classification models developed for financial risk scoring and email spam filtering use cases.

Tools And Technologies: Python, Scikit-learn, Feature Engineering

Movie Review & Financial News Sentiment Analysis

NLP sentiment classification models built to analyze movie reviews and financial news sentiment.

Tools And Technologies: Python, NLP, Scikit-learn

Lung Disease Detection using Lung Sounds

University Project

Deep learning model applying audio signal processing to detect lung disease from lung sound recordings.

Tools And Technologies: Python, TensorFlow/Keras, Deep Learning

TECHNICAL SKILLS

Programming & Data: Python, HTML, CSS, SQL (Basic), Pandas, NumPy, Matplotlib, Seaborn

AI, ML & Generative AI: Machine Learning, Deep Learning, Computer Vision, Generative AI, Prompt Engineering, Neural Networks, Feature Engineering, Model Evaluation, Supervised & Unsupervised Learning

Frameworks: TensorFlow, PyTorch, Scikit-learn, OpenCV, Keras, FastAPI, Streamlit

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Google Colab, Shopify, Microsoft Office

LEADERSHIP & HACKATHONS

- Runner-Up — ByteSprint 2025 Speed Coding Competition
- NeoHacks GIKI Edition 2025
- Flood.pk Hackathon (NIC Peshawar)
- IUPC 2026
- Hack Nation Global AI Hackathon
- Studiio Hacks

ADDITIONAL INFORMATION

Certifications:

Machine Learning, AI & Data Science (eHunar)

- Generative AI Application Developer (NCEAC HEC)
- KPITB AI/ML Program
- Machine Learning (Coursera)
- Python (Coursera)
- Multiple additional Coursera certificates in AI, ML, and Python (6–8 certificates)

Languages: Pashto (Native), Urdu (Fluent), English (Professional Working Proficiency)
